iCloud Mail: Mail Alias

April 2019

File name Mail Alias.csv

File description This file contains the details of all the email aliases the user has created for iCloud Mail on [iCloud.com](https://www.icloud.com). An email Alias is an email address that conceals the user's actual email address from a recipient.

Why Apple keeps this information This is used to manage the email aliases for the user.

Field Name	Details
CreationDate	The date when the user created the email alias.
ModificationDate	The last date when the user modified the email alias.
Name	The full name that the user provided when creating this alias.
Color	The color code of the label that the user selected when creating this email alias.
Alias	Name of the email alias.
IsActive (Y/N/D)	Status of the email alias (active / inactive / deleted).
Email	The email address of the alias. (e.g., user_alias@icloud.com).
